

ZERO

BY AUREA STONE

ZERO

BY AUREA STONE

The originators of the first numerical systems, the Sumerians, were also the first in need of a digit that represented the absence of a number. A double slanted wedge placed between columns of digits was the symbol they adopted for **zero**, which originally served as a simple placeholder to aid in reading complex numbers, not as a number itself.

With the development of positional notation, for which **zero** was crucial, this symbol acquired its own identity and became the independent number we know today. Since then, it has multiplied the power of mathematics, quietly but immeasurably revolutionizing the field.

Zero was born in India but baptized in Europe. The Italian mathematician Fibonacci popularized the decimal system in the Western world and began using the word "**zero**" to designate the current notation. **ZERO by Aurea Stone** precisely symbolizes that, the revolution of the lack of something. For the first time, a material with high-quality quartz properties labelled itself as free of crystalline silica with outstanding original aesthetics.

ZERO exhibits extreme translucency and visual depth reflected in an incredibly realistic natural appearance, free from visible grains in the particulate. Its clear and well-defined patterns stand out due to their versatility and richness in tones and nuances, while its white backgrounds, the purest ever achieved in a synthetic stone, result in an unparalleled reflection of light, clarity, and brightness.

ZERO radically transforms the stone industry with a product featuring the lowest environmental impact in its production, firmly contributing to a healthy and secure work environment while simplifying the fabrication process to the maximum extent possible.

Our commitment: your life

The stone industry is undergoing a transformative journey. The increasing regulations on crystalline silica in synthetic stones have prompted companies to rethink the immediate future of the sector. Once again, **Aurea Stone** proves its visionary approach by anticipating market demands and taking **the lead in driving change with Zero**.

A material designed with cutting-edge technology that maintains the highest standards of high-end quartz surfaces but is **free of crystalline silica** in its composition.

When nothing means everything: ZERO·S, a crystalline silica-free surface revolution

A new and revolutionary way of composing technical stones unfolds before the eyes of the world. **ZERO by Aurea Stone** inspires the future industry trends by introducing **Zero·S**, the first man-made material that maintains the high aesthetic standards of traditional quartz with 0% crystalline silica in its composition.

Zero unravels the secrets and beauty of natural stone. Reflecting unparalleled mastery in a stone with a unique, technologically enhanced formula, it is produced with the lowest carbon footprint of any surface on the market.

Its exclusive formula includes recycled materials such as glass and polyurethane resins, eliminating crystalline quartz from its composition entirely. **Zero·S** behaves and cuts like traditional quartz, but its revolutionary raw material avoids the drawbacks of handling a surface containing silica. Safety and sustainability are the guiding principles throughout the entire value chain in Zero, prioritizing the well-being of the communities involved.

Its cutting-edge Phi 4R + Technology allows for the reformulation of the most sophisticated quartz surfaces -maintaining their outstanding features in terms of appearance, smoothness, and extreme translucency - while improving the composition and manufacturing process of the slabs.

The application of this technology not only results in silica-free surfaces but also in a high percentage of recycled materials incorporated to the body of the slabs, zero water waste in the manufacturing process and a very low environmental impact.

ZERO·S
Surfaces without Crystalline Silica

Replicating the high-end quartz look

With extreme translucency -surpassing that of some natural stones-, incomparable whiteness in its backgrounds and a heightened natural appearance reflected in unparalleled reflection of light, clarity, and brightness, Zero-S can easily rival the pinnacle of high-end quartz surfaces. This revolutionary product stands as a testament to innovation, redefining industry standards.

But it is not just about aesthetics. **PHI 4R+ technology** delivers a non-porous material with minimal water and stain absorption, making maintenance effortless and preserving its pristine appearance over time. Moreover, it confers the surface a high scratch resistance, ensuring enduring beauty.

The full-body performance in Zero slabs adds the realism and dynamism characteristic of quartz surfaces, what not only enhances the slab's visual appeal but also significantly streamlines the fabrication process.

Zero symbolizes a revolutionary leap toward a future where innovation, aesthetics, and environmental consciousness converge seamlessly.

Stepping forward toward a crystalline silica-free industry

The stone industry has initiated a race to comply with the new regulations regarding crystalline silica in countertops. Embarking on a journey of innovation and environmental responsibility, Zero-S surfaces takes the lead thanks to its innovative technology and redefines the possibilities of modern design.

Guided by four core principles -reduce, reuse, recycle, and respect- the **PHI 4R+** cutting-edge technology develops a unique, revolutionary formula that pushes the boundaries of aesthetics, sustainability and functionality.

REDUCE crystalline silica to zero.

RECYCLE materials.

REUSE nearly 100% of water.

RESPECT and a lower environmental impact.

Anti-stain lifetime warranty

Nano Enhancement of Surfaces (NEOS) is a high-performance stain and substance repellent technology developed by our engineers to keep your surfaces clean with minimum maintenance.

Invisible to the naked eye, **NEOS** has been formulated to produce a hybrid protectant with physical characteristics that resist staining, keeps surfaces clean and guards them against everyday wear and tear. With **NEOS**, Zero surfaces are safely protected against most common household chemicals.

Have you dreamt of having the ideal surface? An innovative material that always looks new? The perfect combination of sophistication and durability? A surface that endures over time with minimal maintenance? Wear-free, care-free. **NEOS** technology is the only one to achieve this milestone.

NEOS Technology is designed to add an extra layer of protection. Its permanent bond lasts forever, making Zero surfaces the most durable product in the industry.
